

# The raise

|              |             |                   |           |
|--------------|-------------|-------------------|-----------|
| Target raise | Ticket size | Tickets available | Catchment |
| £250,000     | £25,000     | 10                | 20 miles  |

Funds raised form the equity component of the acquisition, alongside senior acquisition debt covering the balance of the purchase price.

## Indicative use of funds

| Use of funds                                                                          | Allocation  | Amount          |
|---------------------------------------------------------------------------------------|-------------|-----------------|
| <b>Acquisition equity</b><br>Senior debt covers the balance at typical 65–70% LTV     | 60%         | £150,000        |
| <b>Transaction costs</b><br>Due diligence, legal, CQC registration, professional fees | 15%         | £37,500         |
| <b>Post-completion working capital</b><br>Payroll continuity, systems transition      | 15%         | £37,500         |
| <b>Contingency</b>                                                                    | 10%         | £25,000         |
| <b>Total</b>                                                                          | <b>100%</b> | <b>£250,000</b> |

## Target exit

Trade sale to a regional or national consolidator, or refinance-and-hold for yield, 4–6 years from platform formation.

## Next steps

1. Identify and progress diligence on a specific target business within the catchment.
2. Circulate the full business plan, financial model and diligence pack to interested investors.
3. Confirm subscription terms and legal structure.
4. Close the £250,000 round and complete on the acquisition.
